Highly motivated and self-taught Front-end Developer with 1 year of hands-on experience in designing and implementing captivating web interfaces. Looking for an ambitious and growth-oriented organization where I can apply my best skill set to play considerable roles for mutual benefit and be able to find opportunities to take my potential to the next level.

WORK EXPERIENCE

Open UI
(July 01, 2023 - Present)

Front-end Developer

Open UI is an open-source UI library owned by me. I've designed the component library for Reusable components built using Radix UI and Tailwind CSS.

- It's a collection of reusable components ready for you to seamlessly integrate into your applications by simply copying and pasting.
- Users have the freedom to handpick the specific components they require.
- By copying and pasting the code directly into the project, we can effortlessly integrate these components.

Freelancer
(June 10, 2023 - June 25, 2023)

Front-end Developer

Following a layoff from my previous company, I had the opportunity to work as a freelance front-end developer on a React project.

- Collaborated with the other freelancers at Koretex.ai, a leading AI-focused technology company, as a freelance front-end developer.
- Utilized emerging technologies such as AI and Next.js to create innovative and cutting-edge web interfaces.
- Developed responsive and visually appealing UI components, contributing to the overall success of the website.

GiantLeap
(August 25, 2022 - June 04, 2023)

Front-end Developer

- At GiantLeap, I got a chance to work in on-chain technology and the gaming market. Experienced in collaborating with teams to collect and analyze data, develop models, and evaluate their performance.
- Skilled in handling the UI work of entire games using React.js, MUD Game Engine, and Phaser Game Framework.
- Although, the company has decided to shut down the project, here is a sneak peek of the game to see: **https://twitter.com/giantleapgg**
